

# Lacrimalis +

Con mayor concentración de EPA/DHA, ofrece un apoyo nutricional en animales con ojo seco.

- + **Ácidos Omega-3:** Propiedades antiinflamatorias, y ayudan a modificar el perfil lipídico de la lágrima, potenciando la producción y la calidad lacrímal y de esta manera, los síntomas de ojo seco (1, 2, 4, 5, 6, 8, 9, 10, 11, 14).
- + **Minerales (Zn, Cu):** Antioxidantes que ayudan a mejorar la sintomatología del ojo seco y a mejorar la estabilidad de la lágrima (3, 7).

- + **Lactoferrina:** Propiedades antiinflamatorias, antiviricas, antibacterianas y antifúngicas en la superficie ocular (13, 15, 16).
- + **Vitaminas (C, E):** Ayudan a mejorar la producción de lágrima y a aliviar el escozor (3, 12).

## COMPOSICIÓN

**COMPOSICIÓN POR COMPRIMIDO (750mg):** Ácidos grasos omega 3 (DHA + EPA, 60mg) (450mg), Lactoferrina (5mg), Fosfato dicálcico (70mg), Esterato de magnesio (10mg).

**COMPOSICIÓN POR ML (1ml):** Aceite de semillas de lino (fuente de  $\alpha$ -linolénico (ALA)) (679mg), Aceite de pescado (EPA + DHA, 87mg) (291mg), Lactoferrina (5mg), Benzoato sódico (1mg).

**ADITIVOS POR COMPRIMIDO/ML (750mg/1ml):**  
Vitaminas: Vitamina C, Vitamina E.  
Oligoelementos: Cinc (Sulfato de cinc) (2,5mg), Cobre (Sulfato de cobre (II) pentahidratado) (0,1mg).

## INSTRUCCIONES DE USO

Suministrar vía oral, una vez al día, con una de las principales comidas.

Animales de 0-5 kg de peso: 0,5ml o ½ comprimido  
Animales de 5-10 kg de peso: 1ml o 1 comprimido  
Animales de 10-20 kg de peso: 1,5ml o 1 ½ comprimido  
Animales de 20-40 kg de peso: 2ml o 2 comprimidos  
Animales de >40 kg de peso: 3ml o 3 comprimidos

## PRESENTACIÓN

Presentación sólida: 30 comprimidos.  
Presentación líquida: 75ml.

## CONSERVACIÓN

Conservar en un sitio seco, fresco y al abrigo de la luz.

Take care of your pet
